DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: in paragraph [0032], line 3, it appears that "Fig. 8" should be ---Fig. 7---; and in paragraph [0038], line 7, it appears that reference number "152" should be ---132---. Appropriate correction is required.

Claim Objections

Claim 2 is objected to because of the following informalities: it is suggested that the recitation ---at least one--- be inserted before "guide" to maintain consistency with line "b)" of claim 1. Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 and 14 appear to inaccurate and/or misdescriptive. The claims recite that the "arm at least partially surrounds the track". However, in Figure 6 for example, it appears that the track "at least partially surrounds" the arm.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 25 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent no. 563,409 to Pickford.

Pickford discloses a latching member 8 having a latch plate 14 with an inverted channel (channel formed by the claws at 14) and a lip (tip of any one of the claws 14), under which the edge of a tarp can extend in an operable position and an arm extending from the latch plate; at least one guide 13 through which the arm 8 extends; and a prime mover 15 mounted to the latching member 8 for displacing the latching member 8 and returning the latching member to a rest position (by turning).

Allowable Subject Matter

Claims 1-24 are allowed over the prior art of record.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
